Hoods/Built-in

Volete una cappa sottopensile, incassata, da inserire in una struttura in cartongesso? Tra le nostre proposte c'è senz'altro quella più adatta alla vostra cucina. E a voi.

In the market for an under-cabinet, built-in hood to fit into a plasterboard structure? Then, you are in the right place. We most definitely have the best model for your kitchen and you.

Tanti vantaggi in un solo elettrodomestico.

Il suo design a scomparsa, perfettamente a filo con i mobili della vostra cucina, cela un motore di nuova generazione: silenzioso, potente e a basso consumo energetico. I sensori intelligenti monitorano l'aria durante tutta la giornata e attivano la cappa se rilevano la presenza di vapori, proteggendo i pensili insieme ai pannelli laterali e alla visiera frontale in vetro. La cappa inoltre si connette via bluetooth al piano a induzione Elica, regolando automaticamente la propria potenza in base alla quantità e alla qualità dei fumi rilevati. Può anche essere comandata da remoto tramite il vostro smartphone o l'assistente vocale.

So many benefits packed into one appliance.

Its concealed design, flush with your kitchen cabinets, hides a latest generation motor: quiet, powerful, and energy-efficient. Smart sensors monitor the air all day long and activate the hood if they detect vapours, to protect the cabinets along with the side panels and glass front shield. The hood also connects via Bluetooth to the Elica induction hob, automatically adjusting its power setting according to the quantity and quality of the smoke detected. It can also be controlled remotely via your smartphone or a voice assistant

Può attivarsi, regolarsi e spegnersi da sola se l'aria non è pulita. Questa cappa protegge i pensili dall'usura dovuta all'eccessiva formazione di vapore e condensa. La connessione consente di comandarla via app o assistente vocale e può essere connessa via bluetooth al piano a induzione Elica, regolando la potenza di aspirazione in base alle zone di cottura attive. L'app consente anche di contattare immediatamente l'assistenza e monitorare lo stato dei filtri. Il suo design connotato dalle protezioni laterali è studiato per proteggere i pensili della cucina. La potenza luminosa è regolabile a seconda dei vostri desideri.

It can switch on, make adjustments and switch off by itself according to the air conditions. This hood protects your cabinets from damage caused by excessive steam and condensation. Thanks to its connectivity, you can control it via an app or voice assistant, and connect, via Bluetooth, to Elica induction hobs, to adjust the extraction power based on the cooking zones in use. The app also enables immediate access to customer support and check the condition of the filters. Its design, featuring side guards, is crafted to protect your kitchen units. The lighting can be adjusted to reflect the mood you want to create.

Finalmente il vostro piano a induzione è definitivamente protetto dal gocciolio della condensa. Il segreto? Le resistenze elettriche interne ne riscaldano la superficie fino a 42°, riducendo la differenza di temperatura tra il vapore e i componenti metallici. Eliminando il problema! Inoltre, il sistema è affiancato da una griglia (che fa scivolare le gocce in una vaschetta rimovibile) e da un frontalino protettivo inclinato a 45° (che tiene lontano il vapore dalle ante del pensile). Geniale, no?

Finally, your induction hob is protected for good against condensation dripping from the hood. What's the secret? Internal electric heating elements raise the surface temperature to 42°C, reducing the temperature difference between the vapour and metal parts. Problem solved! Additionally, the system is equipped with a grille (which directs the droplets into a removable tray) and a protective front panel tilted at a 45° angle (which keeps steam away from cabinet doors). Brilliant, right?

Integrazione totale, bassi consumi, silenziosità e facilità di pulizia connotano questa cappa con visiera frontale apribile a 45° dalle elevate prestazioni. Funzioni e sensori accendono automaticamente la cappa quando si sta cucinando; impostano la velocità di aspirazione in base alla quantità di fumi e vapori; la spengono quando la qualità dell'aria raggiunge il livello ottimale. Il suo motore di nuova generazione abbate i consumi e la rumorosità anche alla massima potenza. Non è tutto: questa cappa è regolabile via app o assistente vocale e può essere connessa via bluetooth al piano a induzione Elica, regolando la potenza di aspirazione in base alle zone di cottura attive. Inoltre, si integra anche con l'illuminazione della cucina consentendovi di scegliere fra tre diverse temperature luminose (più calde o più fredde). Questo modello è disponibile anche nella versione con filtri antigrasso in acciaio inox.

Full integration, low energy consumption, quiet operation, and easy to clean, this hood features a front shield that opens to 45° for superior performance. The functions and sensors switch on automatically while you are cooking, adjusting the extraction power according to the level of fumes and vapours detected, and switch off when air quality reaches an optimal level. The latest generation motor reduces consumption and noise levels, even at the highest power setting. And that's not all: the hood can be controlled via an app or voice assistant, and connected, via Bluetooth, to Elica induction hobs, to adjust the extraction power based on the cooking zones in use. Additionally, it also integrates with the kitchen lighting so you can select one of the three different light temperatures (warmer or cooler). This model is also available with stainless steel grease filters.

Connessione totale, con l'app e con il piano aspirante. Un design a scomparsa cela un sistema aspirante sempre connesso, capace di dialogare con voi e con il piano cottura. Tramite l'app Elica, potrete gestirne attivazione e regolazione con smartphone o assistente vocale; tramite la connessione via bluetooth al piano cottura e ai sensori intelligenti invece si regolerà da sola, rilevando presenza e quantità dei fumi e attivandosi di conseguenza con la potenza necessaria. Le sue dotazioni non finiscono qui: il motore di nuova generazione garantisce la minima rumorosità anche alla massima potenza, abbattendo i consumi energetici; l'illuminazione a 3 fasi vi permette di scegliere intensità e temperature della luce (dai toni caldi a quelli freddi); l'estrema facilità d'uso si associa all'avviso via app della manutenzione e sostituzione dei filtri di lunga durata: 3 anni vs la media del mercato di 3-6 mesi.

Total connectivity, with the app and with the extractor hob. The concealed design hides an extraction system that is always connected, capable of communicating with you and with the hob. Control when to turn it on and change the settings via the Elica app with your smartphone or voice assistant. Via the connection via Bluetooth to the hob and to the smart sensors, it adjusts on its own, when it detects certain amounts of fumes activating the required extraction power accordingly. Its features don't end here: the latest generation motor ensures whisper-quiet operation even on the highest power setting, and reduces energy consumption; the 3-phase lighting allows you to choose the intensity and temperature of the light (from warm to cool tones); the extreme ease of use is enhanced with app notifications reminding you when to service or change the long life filters: they last 3 years (vs standard filters that last only 3-6 months).

Duct-out

Acciaio inox, nero effetto soft touch
Stainless steel, black soft touch effect

Perfettamente a filo e integrata nel pensile, dispone di un sistema perimetrale che amplifica la superficie di aspirazione. La sua strip a led illumina il piano cottura in modo ottimale. Inoltre, questa cappa a incasso è facilissima da installare: è possibile montarla in meno di un minuto.

Perfectly flush and integrated into the cabinet, it features a perimeter system that enhances the extraction surface. Its LED strip provides optimal illumination over the hob. Moreover, this built-in hood is incredibly easy to install: it can be mounted in less than a minute.

Cappe da incasso. Tutti i vantaggi, in dettaglio. Built-in hoods. All the advantages, in detail.

Protezione dei pensili.

È la soluzione estetica e funzionale di Elica che protegge i mobili dai vapori di cottura. Le protezioni laterali per i fianchi del pensile e la visiera frontale ergonomica a tutela dell'anta prevengono i danni dovuti all'usura mantenendo intatta la bellezza della cucina. A queste protezioni Elica ha anche accompagnato tecnologie innovative, come il sistema No Drip anticondensa e gli speciali sensori che agevolano nella gestione autonoma del prodotto.

Cabinets protection.

It is Elica's aesthetic and functional solution to protect kitchen furniture from cooking vapours. The cabinet side guards and the ergonomic door protection front shield prevent damage from any wear and tear, while maintaining the beauty of your kitchen intact. Elica has also implemented innovative technologies, such as the No Drip anti-condensation system in addition to special sensors to make appliance management easier.

Design Salvaspazio all'interno del pensile delle cappe Boxin.
Space-saving design inside the Boxin hood cabinet.

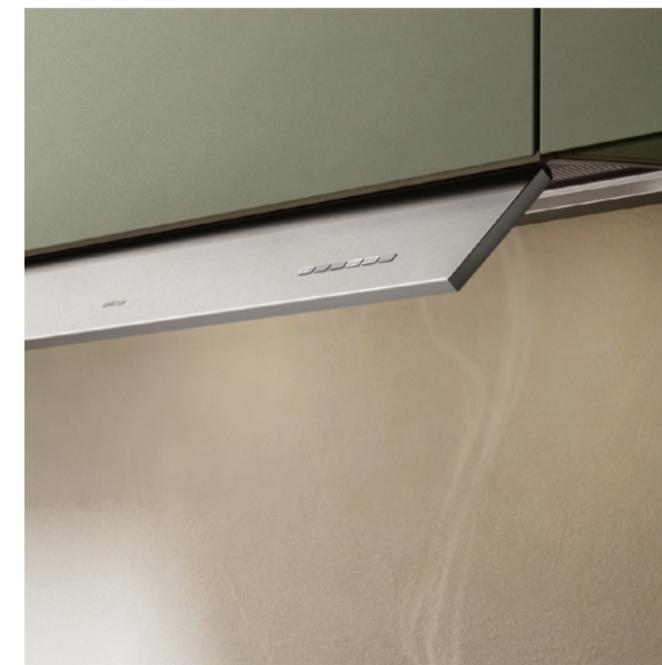

Integrazione totale.

La gamma Elica delle cappe a incasso propone innumerevoli modelli a scomparsa. Quando sono chiusi e non attivi diventano invisibili, garantendo un effetto visivo estremamente lineare.

Full integration.

The line of built-in hoods by Elica offers numerous concealed models. They are invisible to the naked eye when closed and not in operation, providing an extremely linear visual effect.

No Drip, no condensa.

Alcuni modelli integrano la tecnologia che consente di evitare la formazione di condensa e di impedire il fastidioso gocciolamento sul piano cottura mentre si sta cucinando.

No Drip, no condensation.

Some models are equipped with a special technology that prevents condensation and bothersome drips on the hob during cooking.

La connessione bluetooth è presente

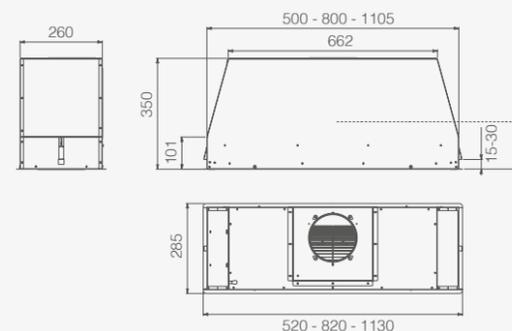

La connessione bluetooth è presente su diversi modelli e consente una gestione della cappa da app o assistente vocale. Permette anche di farla dialogare con un piano cottura Elica, regolando automaticamente la potenza di aspirazione in base alle zone di cottura attivate.

Bluetooth connection.

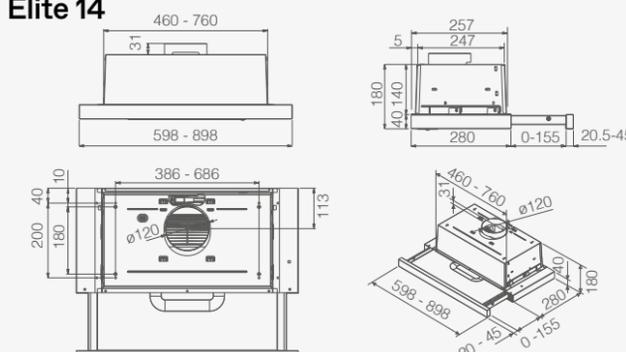

Some models come with Bluetooth connection to control the hood via app or voice assistant. It also allows the hood to interact with an Elica hob, to automatically adjust the extraction power based on the cooking zones in use.
